1> Open Powershell

2> Change Directory and reach the path where you have the project saved

- > The file Path

- >cd till you reach the required location where the app is

```
PS C:\Users\Shubh Sarpal> cd desktop
PS C:\Users\Shubh Sarpal\desktop> cd projects
PS C:\Users\Shubh Sarpal\desktop\projects> cd stopwatch
PS C:\Users\Shubh Sarpal\desktop\projects\stopwatch>
```

3> Enter "npm start" in the powershell now

```
PS C:\Users\Shubh Sarpal\desktop\projects\stopwatch> npm start

> stopwatch@1.0.0 start
> expo start

Starting project at C:\Users\Shubh Sarpal\Desktop\Projects\stopwatch
> Port 19000 is
? Use port 19001 instead? » (Y/n)
```
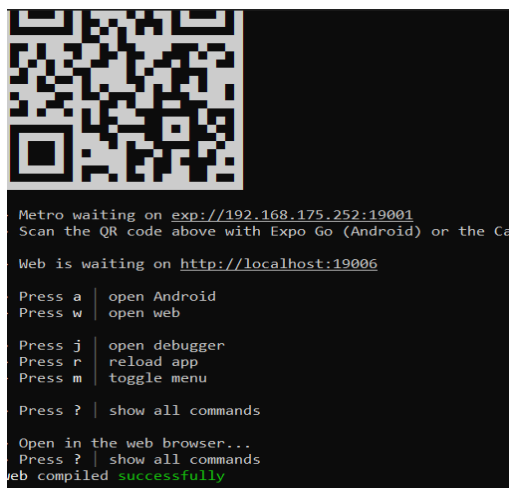

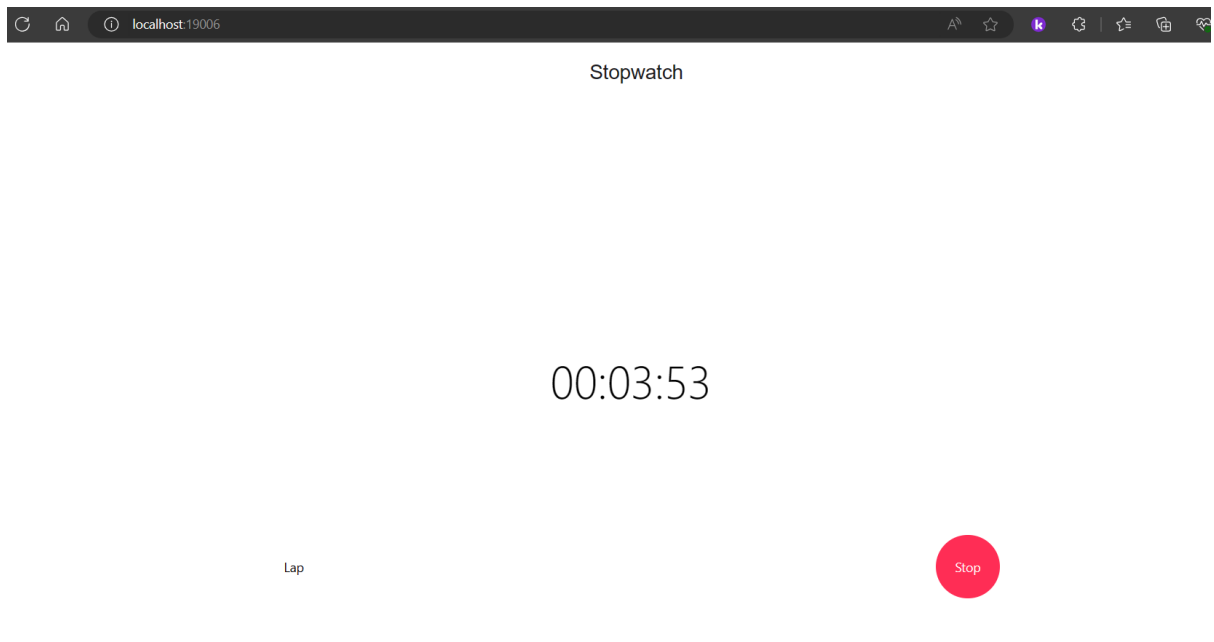

4> If such prompt comes for port already in use just type "y" to continue

5> Now a qr code and link will get generated that can be utilised by the virtue of EXPO GO application in physical mode

Or

You can click "a" and a virtual device will popup with your application or you can just press "w" to open it on web local host.

Stopwatch

00:03:53

Lap   Stop

Alternatively

Just download the apk available in the drive.
